1

INTRODUCTION

This poster provides a presentation of software analysis and development (ADSO) offered by Servicio Nacional de Aprendizaje (SENA), plus my personal expectations about this program.

ABOUT ADSO

2

ADSO is an associate degree with an estimated duration of 27 months. All program will be virtual. ADSO aims to train this students in technological competences related to softwares such as planning, deveolpment and software analysis, programming, quality control and update on new technologies and tendencies. In addition ADSO provides education in english language, physical culture, safety at work and soft skills. Finally there will be a practical part where the apprentice applies his knowledge working in a real environment.

3

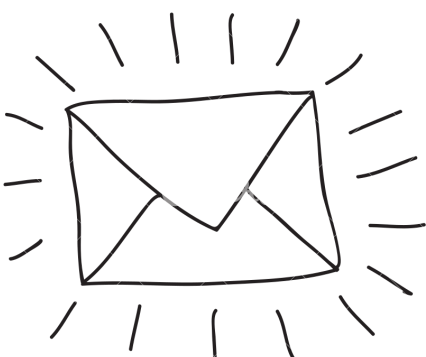

PERSONAL INTEREST

As personal expectations about ADSO, hope that I can learn about how to build a software program or website, from design it to maintenance it. I want to learn programming and make good code, perform my technical abilities and expand my knowledge in thecnology. Aslo I want to improve my english, team work abilities and soft skills.

FUTURE EXPECTATIONS

4

Once I have graduated, I expect to work as programmer or software technician in a technological company, and in a future accomplish a bachelor's degree in software engineering or a related area.
